WITH A SOLID PORTFOLIO OF MINERAL PROPERTIES AND A GROWING TEAM OF MINERAL-TRANSACTION-AND-DEVELOPMENT EXPERTS, GULFSIDE IS WELL POSITIONED TO CREATE SHAREHOLDER VALUE IN 2012 AND BEYOND.

Gulfside has increased the pace of business activity. It is further developing its current mineral assets and anticipates capitalizing on the acquisition and development of several potential strategic properties currently in various stages of due diligence.

#### GLOBAL IRON ORE OPPORTUNITIES

**Gulfside is bullish on iron ore.** Chinese steel consumers and manufacturers are showing increased interest in iron ore from Canada/USA. This strengthening interest is being fueled by strong demand for steel and the desire to diversify from traditional supply sources. North American iron ore is regarded favorably on world markets. Gulfside expects iron ore to present a strong upside for the next few years.

#### RECENT ACTIVITY

**New Director Appointment** - In November, Peter Arendt, P.Eng., a mining industry professional, was appointed to the Board of Directors. As the former president and CEO of Northern Iron Corp. and COO of G4G Resources Ltd., Peter brings extensive senior-level management and mining operations experience.

**Three Iron Ore Properties** - In August, Gulfside optioned three iron ore projects and received final regulatory approval in November 2011.

- **Port Snettisham**, 49 mineral claims about 30 miles southeast of Juneau, Alaska.
- **Rannie Lake**, 172 claims in Labrador, Newfoundland.
- **Roberts Lake**, 128 claims in Northern Quebec along the extensive Ungava Bay iron formation.

**ECM** - October of 2010, Gulfside divested its interest in ECM LLC, a Mongolian Corporation that holds the license to the Erdenetsogt property for a total purchase price of \$2,000,000. The full payment was received October 2011.

**Onjuul Coal Property** - In October 2009, Gulfside acquired an interest in Central Mongolia's Onjuul lignite project. Market conditions, under the terms of that deal, did not allow it to find favorable terms of finance. In Oct 2011, Gulfside divested its interest in the property, selling the exploration data to Lucky Strike Resources for \$325,000 in a series of payments of which the first \$25,000 has been received.

**Four Atlin Gold & Silver Properties** - In the spring of 2011, Gulfside acquired four gold and silver exploration properties in the Atlin mining division in British Columbia: Northern Treasure, Bryer, Golden Fleece and Argonaut. Gulfside began advancing those properties immediately with geological exploration and evaluation for strategic alternatives. November 2011, Gulfside entered into an agreement to sell the Golden Fleece and Argonaut properties, receiving \$25,000 cash immediately, and 300,000 shares of Ocean Park Resources over the next three years.

**NOTE:** All of these properties are in regions that are either in current active exploration and mining, or where historical work has been completed.

In August, Gulfside retained Vancouver-based Brooklyn Pacific Capital Corp. for business and financial advisory services. The principals at Brooklyn Pacific Capital are experienced in Gulfside Mineral's model of strategic global mineral asset acquisition, development and divestiture. They have already proven a catalyst for accelerated operational and transactional activity going forward.

### SIX MONTH OPERATIONAL OBJECTIVES

**Advance the Atlin Gold and Silver Properties.** Over the next several weeks, Gulfside expects to receive assay reports on exploration work it performed on its Bryer and Northern Treasure properties.

**Develop Iron Ore Properties.** Gulfside will be reviewing its new iron ore properties and plans to issue updated 43-101 compliant and other geological reports on them in the months ahead.

**Build a Management Team.** As the company grows and the level of operations increases, Gulfside will selectively add qualified industry executives to key management or board positions.

**Pursue Additional Major Acquisitions.** Gulfside has several properties, in different geographic locations, under consideration or due diligence for acquisition or joint venture. Depending on the results of that due diligence, and subsequent negotiation, Gulfside intends to add to its growing portfolio.

**Proactively Communicate with Investors.** While Gulfside is diligent to keep its shareholders regularly apprised of its progress as it executes on its business plans, it will be more proactive in communicating its progress to a wider audience of both retail and institutional investors worldwide. It will also begin upgrading its website this month.

**Forward-Looking Statements:** This document includes forward-looking statements. Forward-looking statements include, but are not limited to, statements that are not historical facts. When used in this

document, the words such as "could," "plan," "estimate," "expect," "intend," "may," "potential," "should," and similar expressions are forward-looking statements. Although Gulfside believes that its expectations reflected in these forward looking statements are reasonable, such statements involve risks and uncertainties and no assurance can be given that actual results will be consistent with these forward-looking statements. Important factors that could cause actual results to differ from these forward-looking statements are disclosed under the heading "Risk Factors" and elsewhere in the corporation's periodic filings with Canadian securities regulators.

### GULFSIDE BUSINESS STRATEGIES

#### OPERATIONS

Gulfside's profit objective for property assets generally follows along two strategic paths: **Joint Venturing** the operational development and production of proven commercial mineral deposits or, **Profitable Divestiture** of strategic assets for **cash**, including an option for **cash plus participation** in the growth. Participation is usually a proportional equity stake or a net smelter royalty.

#### ASSET ACQUISITION

Gulfside seeks assets that present value opportunities within volatile mineral markets. Gulfside seeks undervalued assets, as well as assets affected by geopolitical risk. It does this by tapping into a growing network of mineral resource contacts around the globe.

#### VALUE ANALYSIS

Gulfside makes value decisions for acquiring assets using both Intrinsic and Relative Value Analysis. Intrinsic Analysis derives value by direct analysis of the property assets. Relative Analysis derives value from the value of surrounding properties.
